

FOR IMMEDIATE RELEASE:

ISOTEC Remediation Technologies Appoints New Senior Remediation Engineer

Advancing Innovatively

October 31, 2016

Lawrenceville, NJ – ISOTEC Remediation Technologies (www.isotec-inc.com) announced today that Paul Dombrowski, P.E. has joined the firm to further develop their steadfastly growing portfolio of subsurface remediation expertise and services. Paul Dombrowski enhances the company with a wealth of experience in the remediation industry, having spent the last twelve years at AECOM where Paul was instrumental in the management and implementation of numerous investigation and remediation projects of varying complexity, scope, and scale.

Paul joins ISOTEC as a Senior Remediation Engineer to continue ISOTEC’s innovative development and quest for remedial advancement across the United States and internationally. Paul comments “I am excited to start this new challenge with ISOTEC and look forward to the opportunities in research, project design and implementation. I am fortunate to be joining a quality company that prides itself on superior site consideration, knowledge of remedial technology, and health and safety.”

Prasad Kakarla, Technical Director for ISOTEC said “Paul’s history, experience and industry knowledge has already made him a key addition to the ISOTEC family. To fill this role with someone of Paul’s caliber only furthers our ability to provide and implement high quality, dependable solutions for our clients. Immediately, Paul’s addition means ISOTEC can now provide quality bioremediation designs, which adds another effective tool to our overall remedial capabilities.”
